Care Instructions

Removal of Stains:

Wet Stain: Gently blot away any extra fluid, apply a cleaner lightly to a soft cloth and gently work into the stained area. Wipe away using a damp cloth. We recommend cleaning of stains with a light application of the cleaning solution. Avoid heavy application of cleaning agents and saturation of the fabric as this can cause damage and leave marks.

Dry Stains: Use a soft bristle brush to gently remove any remaining accumulated matter. If a stain cannot be removed by these methods, a solution of 10 parts water to 1 part bleach can be used. Never use full strength bleach.

Apply the solution to the stained area and allow it to linger on the fabric for approximately 15 minutes. The bleac solution must be thoroughly rinsed away wit clean water and dried using a soft towel.

Any cleaning agent should always be tested on an area of the piece that is not readily visible before being applied to the stained area.
